

træ

stereographic projections in a stage sized pepper's ghost illusion

in an old ship yard we set up a stage sized pepper's ghost illusion to work with stereographic projections. channel separation by the spectral comb filters is possible to reflect with plastic foil and as a starting point for our investigation of luminescent objects floating in mid air, we worked with a theme of trees, creating generative forests and music from wood.

plastic foil, computer, video projectors, spectral comb filters, glasses, own software

collaboration with deborah vlaeymans and johan bichel lindegaard

04 04 2014 work demonstration, the culture yard, elsinore, dk.

15 05 2014 installation, click festival, the culture yard, elsinore, dk.

Field_Notes - Deep Time

sub-arctic residency and conference

in a biological field station in the northernmost finland an international group of artists tried to grapple with deep time; time spans that reach back to the earliest human creations and forward into our species' responsibility as prolonged by the half-life periods of our nuclear waste.

i worked with our walks, as a time journey through geological layers.

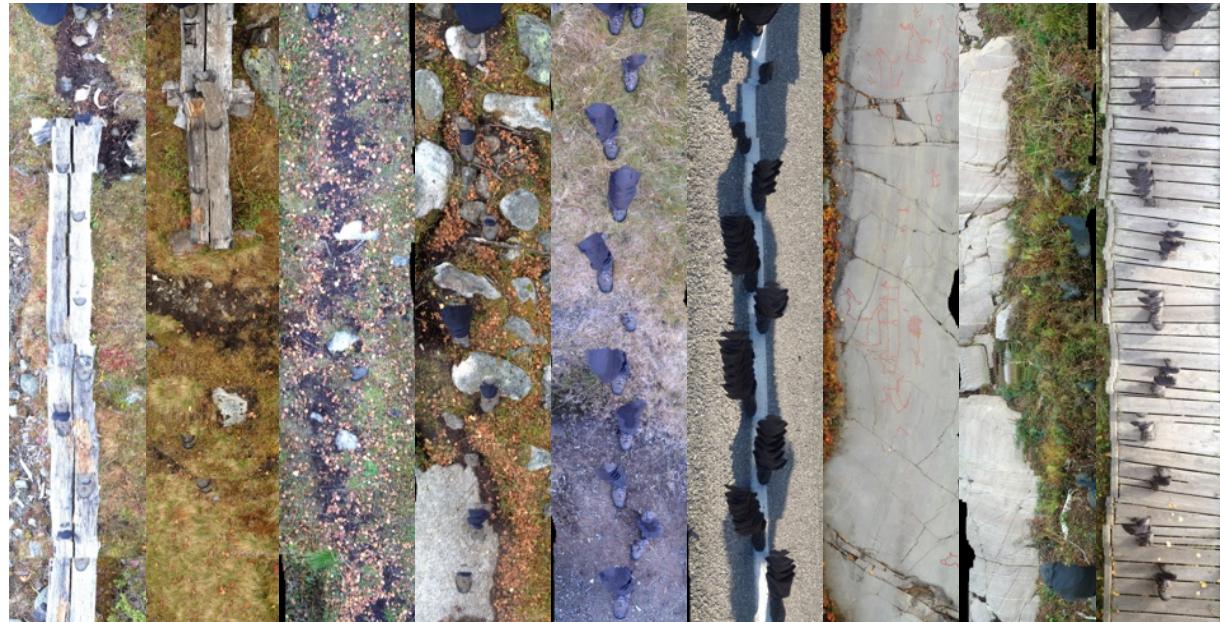

iPhone, walking boots, landscape, stone carvings, own software

Multiplicity

interactive projection sculpture

*a folded structure seems to reflect passers-by as if they were luminescent.
each person has their own color, that blends in the facets of the sculpture.
the directions of the reflections are made obvious by the movements of the audience.*

kinect camera, computer, video projectors, plasma cut folded metal, own software
collaboration with obscura (dk)
permanent installation in fremtidens borgerhus, vallensbæk, dk.

Longing - Fast Forward

artistic research station and one year performance
work in progress

A long-term art project with the people living on the edge of the Greenland inland-ice.

From the summer 2012 an automated research station is monitoring a small settlement throughout the circle of one year. Based on performative experiments with local participants and structural collection of video and sound, the recordings will shape a large scale audio-visual installation, showing the current inner / human and outer / environmental change of pace.

collaboration with anne-sofie norn, daniel plewe and kullorsuaq inhabitants
